

Peggy Mailula

+27(65)922-8653 · peggymailula@gmail.com

Innovative and detail-oriented Full Stack Developer with 4 and a half years of experience building and scaling high-performance SaaS web applications. Expertly combines front-end technologies (React, TypeScript, JavaScript, HTML/CSS) with back-end expertise (Node.js, AWS Amplify, GraphQL, Cloudflare, Frontegg, Cognito) to deliver secure, scalable, and user-centric solutions. Adept at rapidly prototyping, integrating emerging technologies, and streamlining development workflows for speed and reliability. Committed to writing clean, efficient, and maintainable code that enhances both customer and business outcomes. Recognized as a creative problem-solver, proactive collaborator, and technical mentor, focused on continuous improvement, performance optimization, and exceptional user experience.

KEY COMPETENCIES

React	AWS cloud	Microsoft Azure
Typescript	Apollo GraphQL client	HTML & CSS
Javascript	Tailwind CSS	Cloudflare
SQL	Redux	Frontegg
Elysia	Hubspot	DynamoDB

PROFESSIONAL EXPERIENCE

Empath Aug 2024 - Present

- Develop and maintain scalable full-stack web applications using AWS Amplify for backend and deployment.
- Integrate Cloudflare Stream for video hosting, delivery, and live streaming management.
- Implement secure multi-tenant authentication using Frontegg, managing user onboarding and permissions.
- Serve as first-line developer support, troubleshooting customer technical issues and ensuring smooth user experiences.
- Collaborate with cross-functional teams to optimize performance, streamline deployment workflows, and enhance platform reliability.

TRIPPLO Dec 2021 - July 2024

Full Stack Software Engineer

- Actively participate in every stage of development, from concept idealization, design, coding, to deployment. Write clean, functional code on the front- and back-end.
- Write clean and functional code for both front-end and back-end applications.
- Critically evaluate and propose optimizations to enhance existing workflows and optimize product delivery.
- Prioritize industry-grade security standards to ensure the security of all API and data.
- Create and maintain efficient software development pipelines to streamline the development process.
- Managed the release schedule and customer support
